## **Content Outline - The Masters**

[https://en.wikipedia.org/wiki/Masters\\_Tournament](https://en.wikipedia.org/wiki/Masters_Tournament)

I want to build a multi-page website about The Masters golf tournament. I want to organize it to cover the following tabs: home page/general info, the course, format, prizing, records, past-winners, and best amateurs. I hope that this page will teach someone who doesn't know much about golf or The Masters the way the tournament works and why it's so prestigious.

### **The Course**

This tab will give information about Augusta National Golf Club.

### **Format**

This page will be more general to the sport of golf rather than specifically about this tournament. It will cover the scoring format, cuts, times, and more.

### **Prizing**

This page will talk about the development of prize money over the years, as well as the coveted green jacket that is awarded to the winner.

### **Records**

This page will break down important records set at The Masters tournament, like lowest score, course record, and more.

### **Past-Winners**

This page will be a list of all the winners from each year along with some other stats like the runner-up, the winning score, etc.

### **Amateurs**

Each year there are some amateur golfers that are invited to play in the tournament, so this page will break down information regarding amateur golfers at the masters.

### **Sources**

Last page that runs down all the sources used in the Wikipedia article.
